Level 1
Penetration Testing
Service

What is it:

Emantra's pen testing service will simulate an attack on your organisation's computer system or network to identify potential vulnerabilities that could be exploited by hackers.

The goal is to identify weaknesses that could be used to gain unauthorized access to sensitive data and business systems, or to disrupt your business, and then to provide recommendations for improving security and reducing the risk of a successful attack.

Service content:

- Level 1 Blackbox approach
- Uses industry best tools
- Covers network services, web apps, endpoints
- OWASP ASVS compliant
- Expert analysis and conclusions report

Safeguarding Your Business and Customers

About Us :

Emantra is an Australian-owned private company established in 2005. We are an SME with energy and ambition. We operate from Brisbane and Canberra with a national footprint and owned network in Tier 3+/4 data centres. Our main customers are agencies of the Australian Government and large corporates.

Emantra provides bespoke and templated services in Secure Cloud, both sovereign hosting and managed Azure and AWS deployments; Enterprise Cyber Risk Management; and related Consulting services.

We are ISO 27000 Certified and ISO 9000 Compliant. Operations are conducted under the ITIL V.4 ITSM Framework. Our infrastructure has been IRAP-assessed to PROTECTED level. Technicians up to NV-2.

Emantra - proud tenants of CDC Canberra since 2011
